

Jayrup Nakawala

London, UK | jayrupnakawala@gmail.com | github.com/CaptainJack2491 | linkedin.com/in/jayrupnakawala | jayrup.me

With 2+ years of hands-on Linux systems experience spanning Ubuntu, Arch, and hybrid-cloud infrastructure. Strong foundation in system administration, container orchestration, networking, and automation scripting — backed by live production services built, deployed, and maintained independently.

RELEVANT EXPERIENCE

Linux Systems Administrator

Jan 2024 — Present

Personal Research Infrastructure

London, UK

- Administered a multi-node Linux estate (Ubuntu, Arch) across on-prem and cloud infrastructure with a self-hosted zero-trust overlay network (Headscale/WireGuard) and custom routing policies for secure inter-node communication
- Orchestrated 15+ containerized services via Docker Compose with automated backup scheduling, resource monitoring, and centralized NVMe-backed storage provisioning
- Implemented infrastructure-as-code workflows using version-controlled Bash and Python scripts for declarative system configuration and reproducible environment provisioning across heterogeneous hardware
- Diagnosed and resolved persistent CGNAT connectivity issues by reverse-engineering carrier-grade NAT behavior, configuring iptables rules, and deploying a multi-node forward proxy tunnel — restoring high-availability access to internal services

PROJECTS

jayrup.me: Linux-Hosted Portfolio

Nov 2025 — Present

jayrup.me

- Administered an Nginx web server with custom User-Agent routing (curl vs. browser) on a Linux VPS
- Built an rsync-over-SSH deployment pipeline from local Arch environment to cloud infrastructure, maintaining sub-50ms response times

Sandboxed LLM Evaluation Framework

Nov 2025 — May 2026

github.com/CaptainJack2491/Dissertation

- Built a multi-provider API integration layer and sandboxed execution environment, handling authentication, rate-limiting, and request routing across 3 providers
- Designed and ran 960 automated test trials across distributed infrastructure using Python scripting

SKILLS

- Systems:** Linux (Ubuntu, Arch), system administration, filesystem management, permissions, networking (TCP/IP, DNS, routing), performance troubleshooting
- Infrastructure:** Docker, Docker Compose, Nginx, Caddy, Tailscale, WireGuard, Headscale, rsync, automated backups, cloud VPS
- Automation:** Bash, Python, Git, configuration management, infrastructure-as-code, declarative provisioning, CI/CD concepts
- Monitoring:** Resource monitoring, performance tuning, documentation, operational best practices

EDUCATION

University of East London

London, UK

Bachelor's of Science (hons) Data Science and Artificial Intelligence

Sept 2023 — May 2026

- Relevant Coursework: Networking, Database Systems, Big Data Analysis, Data Structures & Algorithms, AI
